Sl No	Assignment	Date	Page No
1	Write a Program to delete the Duplicate elements from an Array.	30/01/2015	1
2	Write a Program to Reverse the elements of an Array.	06/02/2015	4
3	Consider a 2D matrix of length m x n. Find all possible Saddle points from that matrix.	13/02/2015	6
4	Create a Spiral matrix (clockwise) of length r x c.	20/02/2015	10
5	Add two Sparse matrices.	27/02/2015	13
6	Club an Upper Triangular and a Lower Triangular Matrix together.	06/03/2015	19
7	Create, Reverse and Swap the k th and (k+1) th nodes of a Linked list.	13/03/2015	22
8	Implement Queue using Linked list.	20/03/2015	29
9	Implement Stack using Linked list.	27/03/2015	33
10	Add two Polynomials.	03/04/2015	37
11	Search an Array using Linear Search, Binary Search and Interpolation Search Techniques.	10/04/2015	43
